

Monday 28.02.2022.				
20:00	21:00	Participants registration and welcome cocktail		
Tuesday 01.03.2022.				
08:00		Participants registration		
09:00	09:30	Congress opening		
09:30	09:50	Plenary lecture - Status and prospects of fruit production	Zoran Keserović	
09:50	10:05	Plenary lecture - Status and prospects of grape and wine production	Dragoslav Ivanišević	
10:05	10:20	Presentation of the general sponsor - Vanlperen		
10:20	10:35	Presentation of the general sponsor - AgroFresh		
10:35	11:05	Coffee break		
Genetics and breeding of fruits and grapevine	11:05	11:25	The genomes of 204 domesticated and wild <i>Vitis vinifera</i> accessions reveal the history and the genetic ancestry of European wine grapes	Gabriele Di Gaspero
	11:25	11:40	The investigation of reproductive parameters and fertility in plum cultivar 'Timočanka'	Ivana Glišić
	11:40	11:55	Divna', 'Petra' and 'Lana' new plum cultivars from Fruit Research Institute, Čačak	Nebojša Milošević
	11:55	12:10	Properties of promising flat peach hybrids [ <i>Prunus persica</i> (L.) Batsch var. <i>platycarpa</i> ]	Dragan Nikolić
	12:10	12:25	Pomological characteristics of quince hybrids from the crossing combination 'Leskovacka' × 'Triumph'	Aleksandar Radović
	12:25	12:40	Cambial activity and heritability of anatomical traits in <i>Prunus</i> species	Mirjana Ljubojević
	12:40	12:55	Preliminary results of quantitative and qualitative characteristics of the bunch of old <i>Vitis vinifera</i> L. varieties from Herzegovina	Tatjana Jovanović-Cvetković
	12:55	13:05	Presentation of sponsor - Corteva	
	13:05	14:00	Lunch	
	14:00	14:15	New table grapevine varieties - 'Leontina' and 'Valentina'	Nikolić Dragan
	14:15	14:30	Examination of cytogenetic status in some seeds obtained by cross-fertilization and self-fertilization of certain autochthonous and regional grape varieties in R. N. Macedonia	Biljana Korunoska
	14:30	14:45	Research with the aim of clonal selection of local grapevine varieties (Župa wine-growing district, Tri Morave wine-growing region, Serbia)	Darko Jakšić
	14:45	15:00	Evaluation of Furmint ( <i>Vitis vinifera</i> subsp. <i>vinifera</i> 'furmint') clones in the Tokaj wine region	Antal Kneip
	Physiology and ecology of fruits and grapevine	15:00	15:15	Observed changes in bioclimate indices within the winegrowing regions of Serbia

	15:15	15:30	Influence of the soil drought on the mineral composition of almond kernel	Slavica Čolić
	15:30	15:45	Long-term conservation of fruit tree germplasm using different cryopreservation techniques at Fruit Research Institute, Čačak	Tatjana Vujović
	15:45	16:00	Adaptability of low-vigorous cherry rootstock candidates to changing environmental conditions	Tijana Narandžić
	16:00	16:10	Presentation of sponsor - EHO DOO	
	16:10	16:45	Coffee break	
Harvesting, storing and processing technology of fruits and grapevine	16:45	17:05	The degree of fruit ripeness - an important factor in the quality of raw materials in the production of fruit brandies	Branko Popović
	17:05	17:20	Sensory evaluation of club apple cultivars	Jovana Knjeginjić
	17:20	17:35	Calcium carbonate as a new source of calcium for foliar treatments of fruit trees	Nenad Magazin
	17:35	17:50	Influence of post-harvest treatments on the storage capacity of apricot cultivars	Maja Milović
	17:50	18:05	Effects of application of bioregulators in early phases of fruit development on quality, composition and postharvest properties of selected fruit species	Jasna Mastilović
	18:05	18:20	Quality of fruit spirits from new stone fruit genotypes obtained using two common processing procedures in Serbia	Branko Popović
	18:20	18:35	Critical success factors in Harvista (pre harvest 1-MCP) application for quality and harvest management of apples and pears, based on results in Serbia and EU	Slaviša Šestić
	18:35	18:45	Presentation of sponsor - BAYER	

---

Wednesday 02.03.2022.

---

Agrotechnology of fruit and grapevine	08:00	08:20	The application of bioregulators for fruit quality improvement in stone fruit	Biserka Milić
	08:20	08:35	Effect of growing method on yield and quality of fruits of highbush blueberry	Aleksandar Leposavić
	08:35	08:50	Effect of sectorial pruning on productivity, vegetative growth and fruit quality of blueberry cv. 'Duke' ( <i>Vaccinium corymbosum</i> L.) grown as a soilless culture	Jasminka Milivojević
	08:50	09:05	Varietal specifics in the function of plum pruning efficiency evaluation in intensive orchards	Miljan Cvetković
	09:05	09:20	Categorization of vegetative growing points of hazelnut as a basis for innovative pruning on yield	Gordana Đurić

	09:20	09:35	Effect of blossom thinning on yield and fruit quality of golden delicious apple	Dragan Radivojević
	09:35	09:50	Innovative and sustainable practices for fruit growing	Marijana Pešaković
	09:50	10:00	Presentation of sponsor - AgroSava	
	10:00	10:30	Coffe break	
	10:30	10:45	Importance of water quality for irrigation in fruit growing	Jasna Grabić
	10:45	11:00	Potential of using RGB camera in apple orchard	Rea Vrtodušić
	11:00	11:15	Defining of variable maps of pesticide application in cherry plant in accordance with differential vegetation indices	Vladimir Višacki
	11:15	11:30	Effect of anti hail net and early defoliation on the content of some chemical compounds in the leaf and must of Tamjanika	Bešlić Zoran
	11:30	11:45	Importance of the presence of lateral shoots in certain parts of vine canopy	Predrag Božović
	11:45	12:00	The influence of defoliation and cluster thinning on the grape and wine quality of 'Cabernet sauvignon' and 'Probus'	Mladen Kalajdžić
	12:00	12:15	Negative consequences of two shoots cultivation, on an occasion of trunk formation, in first and second year after vineyard planting	Ivan Kuljančić
	12:15	12:25	Presentation of sponsor - Galenika Fitofarmacija	
	12:25	13:30	Lunch	
Pest and disease management of fruits and grape vine	13:30	13:50	Traditional and innovative tools for thesanitary improvement of grapevine propagation materials	Pierfederico La Notte
	13:50	14:05	Apperence of Grape black rot ( <i>Guignardia bidwellii</i> (Ellis), anamorph <i>Phyllosticta ampellicida</i> ) during 2021. years in Serbia vineyards	Jovanka Petrović
	14:05	14:20	Presence of American grapevine leafhopper and grapevine <i>Flavescence dorée</i> disease in vineyards of Ilok during 2020	Mato Drenjančević
	14:20	14:35	Abiotic, and biotic factors affected disease incidence of grapevine trunk diseases in the Tokaj Wine Region, Hungary	Péter Balling
	14:35	14:50	LL017: a novel plant extract fortifying plants – trials on grapevines	Sudiro Cristina
	14:50	15:00	Presentation of sponsor - Artevos GmbH	
	15:00	15:30	Coffe break	
	15:30	15:45	Monitoring of the brown mramorated stink bug ( <i>Halyomorpha halys</i> ) in the orchard as a basis for the implementation of an appropriate control strategy	Dragan Vajgand

15:45	16:00	Antifungal activities of essential oil bearing Lamiaceae plants against citrus sour rot disease agent <i>Geotrichum citri-aurantii</i>	Merve Kara
16:00	16:15	Plum Pox Virus and 'Čačanska Rodna' - influence on the premature fruit drop, yield and quality	Ivan Glišić
16:15	16:30	Identification of <i>Pseudomonas syringae</i> isolates causing bacterial blight symptoms on pear and quince trees in Yozgat province of turkey	Murat Öztürk
16:30	16:45	Monitoring of stink bugs in hazelnut and blueberry orchards with special attention to brown marmorated stink bug ( <i>Halyomorpha halys</i> )	Aleksandra Konjević
16:45	16:55	Presentation of sponsor - KEFO	
17:00	18:00	Round table/Assembly of the Scientific Pomological Society of Serbia	
20:00		Gala dinner	
<hr/>			
Thursday 03.03.2022.			
09:00		Excursion	

\*The organizer keeps the right to make changes in the congress timetable
