### Your connection is not private

Attackers might be trying to steal your information from **localhost** (for example, passwords, messages, or credit cards).

[Hide advanced](#)

Back to safety

You attempted to reach **localhost**, but the server presented a certificate issued by an entity that is not trusted by your computer's operating system. This may mean that the server has generated its own security credentials, which Chrome cannot rely on for identity information, or an attacker may be trying to intercept your communications.

[Proceed to localhost \(unsafe\)](#)
